

SHARING THE WORLD'S MOST INNOVATIVE FARM TECHNOLOGIES

September 9-12, 2024

WHY ATTEND THE

BIG IRON IVP

NDTO's Big Iron International Visitors Program (IVP) is a unique experience that brings together key agricultural stakeholders from across the globe to North Dakota for a week of networking, education, and tours.

North Dakota is home to a variety of companies and organizations based around agriculture, including manufacturing, agriculture technology, and crop production. During this reverse trade mission, NDTO provides a variety of programming to introduce buyers to these innovative companies. IVP Programming runs from September 9-12, 2024, with one day specifically dedicated to attending the Big Iron Farm Show, which features over 800 exhibitors.

THE NORTH DAKOTA ADVANTAGE

North Dakota's manufacturers and distributors of agricultural equipment help farmers throughout the world overcome production challenges and improve efficiencies. North Dakota is home to agricultural equipment companies that supply a full range of machinery used primarily for large-scale agricultural production.

Their equipment and supplies include crop seed, complete lines of field tractors, trucks and trailers, crop seeders, grain storage systems, cultivators, harrows, conveyor systems, chemical applicators, combines, and a full array of harvesting equipment for grains, oilseed crops, and potatoes.

AGRICULTURE | TECHNOLOGY MACHINERY | EDUCATION
